## MONDELUZ

Highly concentrated, perfectly dispersed pigments are the hallmark of the entire Mondeluz color range. Used wet or dry, Mondeluz Aquarells maintain excellent light permanency, and have an unsurpassed ability to make dense strokes that lay down beautifully on many surfaces. The finest binders and additives are also combined into this unique formula to ensure excellent solubility of all components.

| Item #          | Description  | MSRP  |
|-----------------|--------------|-------|
| BB. FA3722.12BC | 12 Piece Set | 17.95 |

## POLYCOLOR

A key component of the Polycolor formula is the use of special oils in the pencil lead. These oils along with other binders allow the Polycolor pencil to create dense, even strokes without the use of heavy pressure. The 3.8 mm lead diameter is an added artistic value to these pencils. The broad edge is excellent for shading, while a finely sharpened point creates exquisite detail. These leads are encased in California Cedar for easy sharpening. The end result is a water-resistant, non-toxic pencil that layers and blends beautifully without a waxy buildup.
