

MIXING PROCESS COLORS

Cyan, Magenta, Yellow, Black

Note: The tinting strength for cyan is less than the other process ink colors. Double the amount of cyan ink called for in the Pantone® Process formula. Examples below:

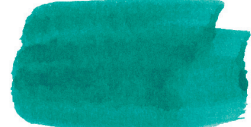

PMS® SWATCH

INK SWATCH

4-Color Process PMS® Color DS 221-3
C 95 / M 25 / Y 0 / K 0 (Ratio 4 C : 1 M)
Drawing Ink Ratio: 8 C : 1 M

4-Color Process PMS® Color DS 254-1
C 100 / M 0 / Y 50 / K 0 (Ratio 2 C : 1 Y)
Drawing Ink Ratio: 4 C : 1 Y

4-Color Process PMS® Color DS 32-1
C 0 / M 50 / Y 100 / K 0 (Ratio 1 M : 2 Y)
Drawing Ink Ratio: 1 M : 2 Y

KOH-I-NOOR.

TRANS-MIX MEDIA™ DRAWING INKS

Color Range: 20

Sizes: .75 oz, 1 oz, 8 oz

Type: Pigmented Acrylic Base

This professional grade drawing ink is available in our .75 oz squeezable bottle with spout under the Trans-mix Media name as well as in the larger 1 & 8 oz bottle sizes with a flip up spout under the Drawing Ink name. All bottle designs allow for easy measuring and dispensing of ink for mixing ratios and for filling technical and drawing pens.

This ink uses micro-pulverized pigments which are evenly dispersed in an acrylic base, making colors more lightfast than dye-based inks. All inks are water resistant and can be used with technical pens, airbrushes, crowquill pens, and paint brushes on paper and board. Our process colors: Cyan, Magenta, Yellow and Black, can be mixed to achieve approximate matches to Pantone® Process formulas.* Shake well before use as pigments may settle out over time. Made in the USA.

*Pantone® and PMS® are registered trademarks of Pantone in the United States and/or other countries and is not affiliated with Koh-I-Noor® or Chartpak® in the United States and/or other countries.

Printed swatches may not be a true representation of the actual color.
